Travel

Flights

The most popular search engine to you can compare the price of flights is [SKYSCANNER](#).

The first question to ask yourself is whether to buy a one-way or return ticket. (It is not mandatory to purchase a return ticket to enter Australia). It is usually cheaper to buy a return than 2 singles.

There are also "open" tickets, or tickets which can be flexible at a certain cost. Some companies offer stopovers without extra charge, so why not make the most of it and stop over somewhere in the sun on the way!

Public Transport

Sydney has a good network of Trains, Buses, Ferries, and Light rail option for you to get around, so you'll have no trouble getting to work or exploring Sydney.

You'll need a re-chargeable [OPAL card](#) to "tap on" and "tap off". You can make deposit on the card manually or set up a direct debit to automatically deposit funds and "top up" you account balance so you can travel.

If you need to plan a trip or want to know a certain timetable <https://transportnsw.info/trip#/trip> is very handy web site to use. Alternatively, you can download the **Trip View App** to your mobile.

The best web site to use is - <https://transportnsw.info/>

Driving licence

UK, Canadian and American driving licence holders can drive legally with their overseas licence in all Australian states except the Northern Territory. However, it is still recommended to obtain an International Driving Permit (IDP)

Foreign-language overseas licence holders must obtain an International Driving Permit (IDP)

For more information on driving legally in Australia or to apply for a IDP see [HERE](#)
